

HEATING - COOLING - PLUMBING

Worry-free heating,
cooling, and plumbing

THE PV STORY

You deserve HVAC and plumbing that work.

That's what we strive to deliver every day. As a family business led by three brothers, the PV team understands that you need peak performance from your plumbing and HVAC systems at all times. After all, it's what we demand for our own homes.

A struggling A/C or clogged kitchen sink shouldn't disrupt your life.

When we started PV in 2008, Metro Atlanta needed an alternative to what frequently passes for HVAC service. Too often, contractors cut corners when selecting, installing, and servicing equipment. Even supposedly reputable and "reliable" companies are out for the cheapest fix—not the right one—and homeowners pay the price in stress, added repair costs, and suboptimal performance.

Trade the headache of substandard HVAC and plumbing service for consistent indoor comfort and peace of mind with PV. We deliver the best long-term solution for every issue. No quick patches, no annoying repeat visits. Just a team you can trust to protect and care for your home's systems the right way.

Feel comfortable 24/7/365

That's our goal for all things HVAC! We want you to be comfortable at home and free from worries about your heating and air conditioning system—always.

SERVICES WE OFFER

We offer several types of HVAC and plumbing services:

HVAC Repair

HVAC and Plumbing Maintenance

HVAC System Replacement

HVAC Design, Weatherization and Energy Audits

Indoor Air Quality

Plumbing, Drain, and Sewer

PLUMBING, SEWER, AND DRAIN SERVICES

Keep your plumbing in top working order.

You deserve to live in an environment where everything just flows. No annoying clogs. No damaging leaks. Just functional plumbing that you never have to think about.

That's why we offer these plumbing services:

- ✓ Water heater service and installations
- ✓ Drain and sewer cleaning and clog-busting
- ✓ Gas line service and safety inspections
- ✓ Re-piping projects in existing homes
- ✓ Water filtration system installation
- ✓ Emergency plumbing service
- ✓ Toilet, sink, and faucet installation and repair
- ✓ Pipe repair

HVAC AND PLUMBING MAINTENANCE

Maximize the lifespan of your HVAC and plumbing systems with regular maintenance.

Maintenance is critical for staying comfortable, saving money, and optimizing your home's mechanical systems.

A **maintenance plan** minimizes your chances of a heating mishap in winter, an A/C breakdown in July, or an inconvenient plumbing problem at any time of the year.

At PV, we also provide priority service for all maintenance plan customers. That's why we call it the **PV Priority Plan**—you go to the top of the list any time your HVAC or plumbing system needs our attention!

The PV Priority Plan includes...

- ✔ Two HVAC system inspections per year
- ✔ Plumbing system maintenance once per year
- ✔ Savings on parts and labor
- ✔ Priority service, no matter what

One-time tune-up vs. the PV Priority Plan

Compare the value of a one-time tune-up to the value you receive with a PV Priority Plan for all HVAC and plumbing maintenance:

One-time HVAC tune-up	One-time plumbing tune-up
<ul style="list-style-type: none">Operational startup inspectionSafety reviewStandard 1" filter replacementDrain line inspection	<ul style="list-style-type: none">Water pressure checkWhole-house plumbing inspectionSafety reviewWater heater inspection

PV Priority Plan

Everything from BOTH one-time tune-ups, PLUS:

- ✓ Two HVAC service visits and one plumbing visit per year
- ✓ Reduced service charges
- ✓ Service charges waived when you need a repair
- ✓ 15% off all repairs
- ✓ Priority customer service
- ✓ Free HVAC drain line cleaning (twice yearly)
- ✓ Free outdoor coil cleaning
- ✓ Flame sensor cleaning
- ✓ Minimal system problems or breakdowns
- ✓ Better energy efficiency
- ✓ Safety and health benefits

HVAC REPLACEMENT

We offer Atlanta's highest quality HVAC system replacement.

Is it time to replace an aging heating and air conditioning system?

Are you facing high repair costs and wondering whether to retire the old unit? You won't find a more comprehensive or effective HVAC installation from any other local contractor. Seriously.

Here's how PV handles heating and A/C system replacement:

Load calculation

We do this before every installation to ensure your new system is the right size and type for your home.

Variety

Choose from an array of different HVAC system options that address every comfort and budget requirements.

Ductwork inspection

This ensures your ducts are the correct size and length and that they're in good condition.

Quality control audit

Our team performs a rigorous audit after every installation to ensure we meet every comfort and efficiency benchmark.

10-year labor warranty

Sign up for our PV Priority Plan after the installation and enjoy peace of mind for an entire decade.

HVAC DESIGN

When it comes to comfort, efficiency, and system longevity, HVAC design is everything.

Does your A/C or heating system struggle to keep you comfortable?

Are certain rooms less comfortable than others? Do you wonder why your energy bills are so high?

Improvements to HVAC design can help you stay comfortable everywhere in your home, at all times of year.

- ✓ Enjoy consistent temperatures—no more hot and cold spots.
- ✓ Get HVAC equipment that's the right size and type.
- ✓ Keep humidity low in summer and higher in winter.
- ✓ Breathe cleaner with improvements to indoor air quality.
- ✓ Lower your energy bills while improving comfort.
- ✓ Maximize the lifespan of your HVAC equipment.
- ✓ Minimize the risk of HVAC repairs.

ENERGY AUDIT & WEATHERIZATION

Is your home as efficient as it could be?

Get rebate-eligible energy efficiency improvements with these services:

- ✓ **Home assessment & energy audit** to identify your best opportunities for energy improvements
- ✓ **Air sealing** to prevent unwanted air infiltration
- ✓ **Insulation services** to boost your home's thermal performance
- ✓ **Indoor air quality improvements** to improve your health
- ✓ **Duct sealing** to save energy and improve comfort

INDOOR AIR QUALITY

Breathe cleaner, healthier air inside your home.

Did you know that indoor air is often more polluted than outdoor air?

To improve indoor air quality, our team analyzes your home, HVAC system, and ductwork while accounting for your specific health concerns.

There's a unique air quality solution for every home.

You may benefit from a combination of...

- **Improved filtration** via a media filter or HEPA system
- **Whole-house dehumidifier** to lower moisture levels and prevent microbial growth
- **UV lights** that destroy harmful contaminants inside your ducts
- **Fresh air systems** such as energy recovery ventilators (ERVs) or ventilation dampers
- **Air sealing and duct sealing** to prevent infiltration of polluted air
